**TERMS AND CONDITIONS - SEE REVERSE**

You as the property owner are solely responsible for locating lines, water pipes, and any other buried objects not related to public utilities. You will release the company formal liability resulting from such damage.

All wood fences are built on site using ACQ pressure treated pine, constructed with 1" x 6" pickets on 2" x 4" x 16" stringers on 4" x 4" posts with 30 pounds of concrete anchoring each post. Walk gates will hinge on 4" x 6" posts. Drive gates will hinge on 6" x 6" posts. Due to the weight and wind resistance of drive gate "leaves", drive gates cannot be warranted.

**PAYMENT DUE UPON COMPLETION OF JOB.** If collection assistance is required, customer will be responsible for any and all legal expenses. If paying with credit card, 2.2% will be added for processing fees
